Motorcycle Helmet Ergonomics Study
The University of New South Wales is conducting a study on the helmet fit of Sydney motorcyclists, as part of an Australian Research Council funded project to evaluate the performance of helmets in real crashes.

Does your helmet fit?
Has your helmet been properly fitted? Is it correctly positioned and securely fastened?

Test your helmet roll-off propensity
We'll look at your helmet fitment with respect to your head size and conduct a simple roll-off test to determine the force required to displace your helmet on your head.

Enter our draw to win one of three $300 vouchers to spend on any RJays gear from your nearest Motorcycle Accessories Supermarket store*.  

*Terms & Conditions apply

If you would like to participate or for more information about the study, please visit our website at:
